OFFICE OF THE SENIOR SURGEON
WITH THE GOVT. OF MYSORE,

BANGALORE, 7th September 1925.

From B. Mahomed Usmon, Esq., L.M.S.,
Senior Surgeon with the Government of
His Highness the Maharaja of Mysore,
Bangalore.

7 SEP 1925 G. D. SECTION

17461

To The Secretary to the Government of
His Highness the Maharaja of Mysore,
Local and Legislative Departments, Bangalore.

3

Sir,

With reference to your letter No. 1505-Med.35-25-2, dated 31st August 1925, enquiring how the defects regarding the supply of medicines to dispensaries, pointed out at the Budget Session of the Representative Assembly of 1925, are proposed to be remedied, if they are based on facts, I have the honour to inform you that the omission to send an indent to Europe during 1922, coupled with certain defects in the working of the Medical Stores might have resulted in a certain amount of confusion in the work of compliance with the annual indents of medical institutions in the past.

As revised Rules for the working of the Medical Stores have been issued with Government Order No. L.6477-79/Med.139-23-4, dated 6th March 1925, and strict adherence to these Rules will be insisted upon, inconveniences of the kind are not expected to recur.

The annual indents are drawn up so that the stock on hand at the beginning of the year for which the indent is intended, together with the quantity indented will, in each case, be sufficient for 18 months as based on the expenditure for the 12 months preceding the date of indent. Where a particular drug is run out or is not expected to last till the receipt of the next annual supply, the necessary quantity is expected to be obtained by the medical officer in charge, on a special or extra indent, under Rule 14 of the Rules.

It will further be seen from the programme laid down in Rule 13 that the supply to the institutions of the Malnad Districts of Hassan Kadur and Shimoga has been arranged in the months of February, March, and April, which precede the break of the South-West Monsoon, so that

(6)

that the supply will be full just when sickness is most prevalent. I may also add that in some places there appears to be a certain amount of dislike for cinchona febrifuge which has been officially recognised as a substitute for quinine to which the people have long been used.

I have also intimated to the Stores Purchase Committee in my letter No.C.2224-3, dated 12th March 1925 the absolute necessity of arranging for the receipt of the next supply from Europe in November 1925, as timely and adequate supply to institutions entirely depends on the action taken by the Committee and the receipt of the supply here in time.

I have the honor to be,

Sir,

Your most obedient servant,

Senior Surgeon.

G. D. SECTION.

The Secretary to the Government of
His Highness the Maharaja of Mysore,
Local and Legislative Departments,
Bangalore.

Med 35-25-4

With reference to your letter No. Camp 18 Med. 35-25, dated 1st October 1925, enquiring what the extra cost would be if quinine is supplied to medical institutions in place of cinchona febrifuge, I have the honour to state as follows-

To have the effect of a dose of, say, 5 grains of quinine the dose of cinchona febrifuge is about 8 to 10 grains. Thus, one pound of quinine may be said to be equal, therapeutically, to about 2 pounds of cinchona febrifuge. One pound of quinine will therefore have to be replaced by two pounds of cinchona febrifuge. One pound of quinine costs Rs.24/- and two pounds of cinchona febrifuge cost Rs.18/-. Thus the saving that will be effected by substituting for one pound of quinine its therapeutic equivalent (2 lbs) of cinchona febrifuge, will be Rs.6.

For some years past the total requirements of the Medical institutions in respect of quinine has been put down as 1,500 pounds. But considering that the number of malaria cases treated has steadily increased 490,000 in 1924 against 376,000 in 1923 or by about 33 per cent and the number of medical institutions has also been increasing, and there has been a cry for the supply of more quinine, I am of opinion that the qantity of quinine to be stocked for the use of medical institutions may be fixed at 2,000 pounds this year.

Also, considering the fact that cinchona febrifuge is recommended only in particular types of malaria, it would be sufficient, in my opinion, if only 500 pounds of quinine be replaced by its equivalent of cinchona febrifuge, viz., 1,000 pounds.

In the annual Europe Indent now placed with the Stores Purchase Committee, 1000 pounds of quinine and 1000 pounds of cinchona febrifuge have been included and their total cost comes to

1000 lbs. Quinine at Rs.24 ...	Rs.24,000
1000 lbs.Cinchona Febrifuge at Rs.9	Rs. 9,000
Total	Rs.33,000.

If the 1000 cinchona Febrifuge be substituted by their equivalent of quinine 500 lbs., the total cost of 1,500 pounds of quinine will be Rs.36,000/-

and the extra cost will be Rs.3,000. But I think that it will be safer to retain the 1,000 lbs. of quinine and the 1000 lbs. of cinchona febrifuge now entered in the Europe indent and get another supply of 500 lbs. of quinine towards the close of the year at an extra expenditure of Rs.12,000 if the quantity now indented is found to be running out before the close of the year, in which case an application will be made to Government in good time for additional grants that may be required.

I have the honour to be,

Sir,

Your most obedientservant,

Senior Surgeon.
